

M&P CABLE TROLLEY: description and bobbin combination

We have the pleasure to present you the brand new **M&P cable trolley** in it's more updated Version. Please have a look also to our video presentation on YouTube looking for https://www.youtube.com/watch?v=F43oBKhf_Ps

This Special Stand, suitable for showroom or workshop, holds a poster on top, which will show all the cables and their features for a quick and easy reading. Great Marketing device! Very attractive appearance, suitable to put into any showroom.

Can be moved easily. One person can load it easily into a van even with all the cables in place. Very fast displacement, will be an eyecatcher on any trade show and will boost the sales!

In the YouTube presentation, we have shown the trolley loaded over a large scale, simulating the easy loading of the trolley on the flatbed of a van.

No need to say that the trolley is so well balanced that anyone can handle it the same way as a baby stroller (trolley itself 25 Kg+ cable =100-110 Kg in full agility) (220-243 lb). (+ accessories)

The loading and unloading of the van are a breeze, and effortlessly the trolley is brought to the booth in the trade fair, facilitating the sales, giving attractive image on the products, and when comes time to return home, everything is easier to manage: from the booth to the van, from the van to the showroom, only by removing the banner.

Allocated into three sections, the upper, intermediate and lower, threaded on special bars, are placed coils of predetermined size, such that on each section, (bar), can find place 2 smaller reels or a single larger one.

It follows that we can have combinations of 3 large bobbins, or 6 small ones, or mixed combinations of 1 large and 4 small or 2 large and two small.

Following is a sharp and clear view of how could be possible to "dress up" your Cable trolley We have added a bracket holding a set of cables 1 m (3 feet) long, hanging for customers flexibility test: each cable has a connector on one side, showing the consistent quality of each connector. Moreover we have added a winding device with meter counter, for making customized coils easily.

Overall Diameter mm. Inches			Meters Per Bobbin		Feet per Bobbin	
			Small	Large	Small	Large
Cables O.D. Ø 5 mm (0,197 ")	Rg58 C/U M&P-Airborne 5		500 m.	1000 m.	1640 ft	3280 ft
Cables O.D. Ø 5,4 mm (0,212")			400 m.	800 m.	1312 ft	2624 ft
Cables O.D. Ø 7,3 mm (0,287")	M&P-UltraFlex 7		200 m.	500 m.	656 ft	1640 ft
Cables O.D. Ø 7,6 mm (0,299")	CPR 6x0,75(Rotator cable)		250 m.	500 m.	820 ft	1640 ft
Cables O.D. Ø 10,3 mm (0,405")	M&P-UltraFlex 10 M&P-HyperFlex 10 M&P-BroadPro-50C M&P-Airborne 10 RG 213/U		100 m.	200 m.	328 ft	656 ft
Cables O.D. Ø 10,8 mm (0,425")	RG 214 A/U		100 m.	200 m.	328 ft	656 ft
Cables O.D. Ø 12,4 mm (0,488")	M&P-BroadPro-50C Double Jacket			100 m.		328 ft
Cables O.D. Ø 12,7 mm (0,50")	M&P-UltraFlex 13 * M&P-HyperFlex 13 *			100 m.		328 ft

* = for these 2 cables the meter counter is not operative due to their thickness

Example of cables set up

Example of a comprehensive starter kit with 6 bobbins:

Section 1	M&P-Airborne 5	500 m	1640 ft
	M&P-Ultraflex 7	200 m	656 ft
Section 2	CPR 6x0,75 (rotator cable	250 m	820 ft
	M&P-ULTRAFLEX 10	100 m	328 ft
Section 3	M&P-BroadPro-50C	100 m	328 ft
	RG 213/U	100 m	328 ft

Example of a comprehensive starter kit with 5 bobbins:

Section 1	M&P-BroadPro-50C DJ	100 m	328 ft
Section 2	M&P-Ultraflex 7	200 m	656 ft
	M&P-ULTRAFLEX 10	100 m	328 ft
Section 3	M&P-BroadPro-50C	100 m	328 ft
	RG 213/U	100 m	328 ft

Example of a comprehensive starter kit with 4 bobbins:

Section 1	M&P-BroadPro-50C DJ	100 m	328 ft
Section 2	M&P-Ultraflex 7	200 m	656 ft
	M&P-Airborne 5	500 m	1640 ft
Section 3	M&P-ULTRAFLEX 10 or Hyperflex 10	200 m	656 ft

COMPREHENSIVE CABLE SOLUTION: M&P TROLLEY

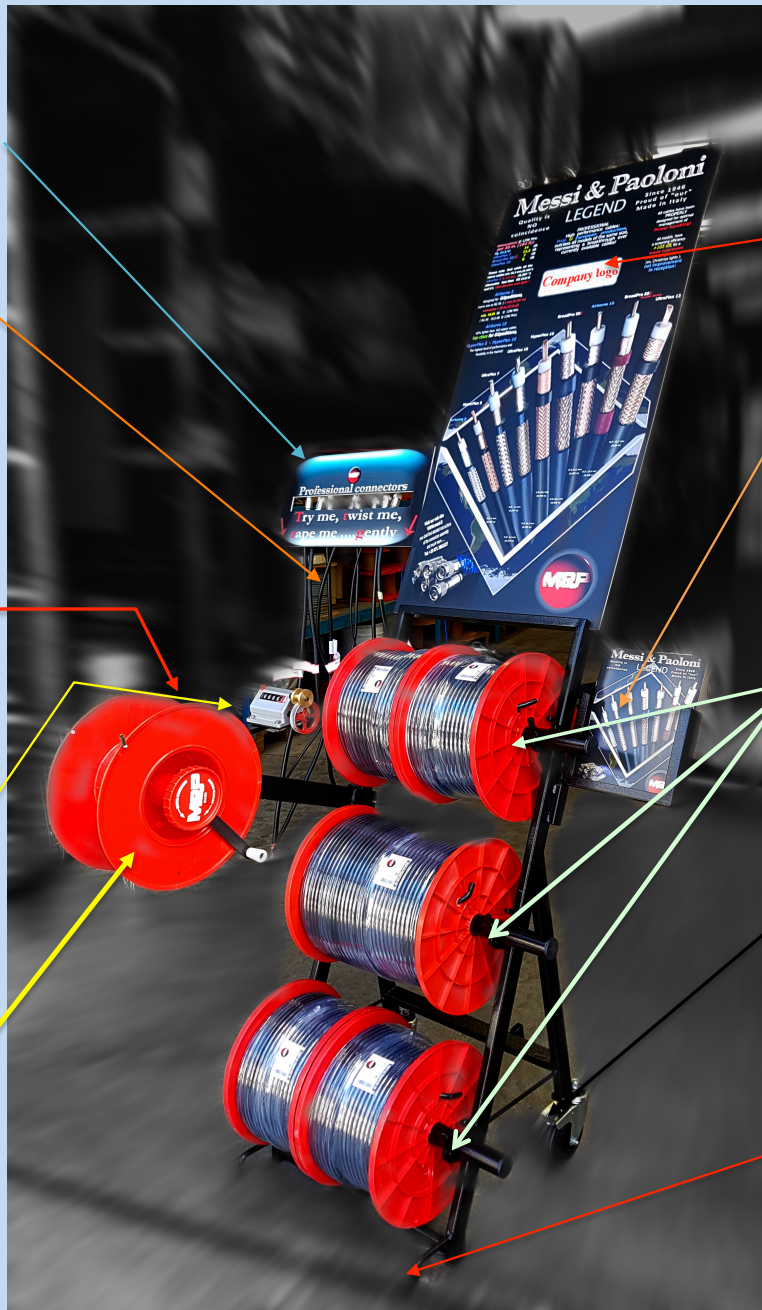

Mini board with window for showing connectors fitted to each cable

Set of cables 1 m (3 feet) long, hanging for customers flexibility test
